

888 DESCAL

DELTA
PRODUCTS
GROUP

The unique safety features of **Delta's 888 DESCAL** let our innovative technology remove all stubborn fouling deposits right down to the bare metal. Safely dissolves most calcium scale and rust deposits from water-operated systems. Simply introduce the recommended quantities of **Delta 888 DESCAL** into a circulating loop flowing from bottom to top of units. Eliminate system bleed-off and chemical treatments during cleanings. Watch for excessive foaming and add **Delta 888 DESCAL** slowly. Entire tower systems may be cleaned online by adding our **PS 8000**. Most cleanings finished within 2-4 hours or when solution stops foaming. Overnight soak is possible. Our descalers may be added directly to pre-treated systems and may be disposed down regular sewers with water. This is our most universal descaler and can be adapted to successfully clean most any fouled equipment or systems. Please contact a local rep or our office for additional, helpful information on our many capabilities.

Additional 888 DESCAL Benefits

Environmentally Friendly

- Non-Toxic, Non-Hazardous, Biodegradable
- No Compatibility or Waste Disposal Issues

Rapid Cleaning

- Most Cleanings Accomplished within Hours
- Overnight Soaking is Possible

Energy Savings

- Considerable Energy Savings Annually
- Return on Investment in Just a Few Months

Safe to Touch

- Safe Enough to Hold in the Open Hand
- There are NO Hazards to Your Equipment

Onsite Labor & Training

- Delta Professional Services Offered
- Onsite Supervision and Training Available

Areas of Application & More

- Pipes, Heat Exchangers and Condensers
- Cooling Towers, Chillers and Air Compressors
