

COOLSHIRT SYSTEMS

Work better, safer and longer in hot environments.

Maintain a safe core body temperature

All cooling solutions:

- Prevent heat stress
- Increase efficiency
- Increase productivity
- Reduce errors

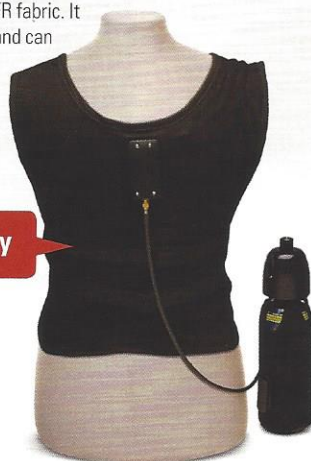

OSHA has determined that the use of personal cooling devices can prevent heat stress in the workplace.

OSHA Fact Sheet No. OSHA 95-16

Porticool 2 System

The lightest, untethered, active cooling system and the only one that can be worn in a fire. It features full portability and moisture-wicking FR fabric. It requires no electricity, and can be used in intrinsically safe areas.

PCS2 . . . Garment, hose, control module

Full Portability

**Multi-purpose/
Multi-person System**

Larger 15 gallon cooling capacity for convenience. Cooling station cools up to 6 people simultaneously.
